

# THE GLEICHEN CALL

VOLUME XXIX NO. 19

GLEICHEN, ALBERTA, WEDNESDAY JULY 22, 1936

SUBSCRIPTION \$2.00 PER YEAR

## SCOUT AND GUIDE ASSOCIATION HAVE GOOD BALANCE

A very satisfactory financial report has been submitted in connection with the two booths: hamburger, coffee and pie; the other ice cream, soft drinks and confectionery, operated by the local Girl Guide and Boy Scout Association on Stampede Day. Mr. C. W. Halstead, who was appointed general manager, reports a most successful day. The total amount taken in came to \$404.81, while the expenditures amounted to \$211.29, leaving a balance of \$193.52, which sum is to be divided equally between the Girl Guide Association and the Boy Scout Association.

The Guide Association will receive \$96.77 and the Scout Association \$96.75.

Special meetings held prior to Stampede Day and untiring efforts were put forth in an endeavor to make the very best use possible of the concessions, which were donated by the local Stampede Association. A buying committee composed of Messrs. C. W. Halstead, G. H. Gooderham and H. Hunter was appointed. The results bespeak for themselves and it is considered that the manner in which the local Guides and Scouts conducted their booths is highly commendable.

Mr. Halstead wishes to convey on behalf of both Associations their very keen appreciation to all those who so generously helped to make the day a financial success.

## FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

Miss Lillian Moss left Tuesday to visit her sister Mrs. McCaig at Scott.

O. P. Solberg visited in town Sunday, this being his first trip in since last fall. He reports the crops around Lake McGregor looking fine.

Chief Tridoff died last Friday on the Blackfoot reserve. He was one of the best known Indians on the reserve, and was well liked by his brethren.

John and Albert Hightwood have joined the 21st Battalion and are now taking a few days leave at Kamloops before returning to camp.

The Girl Guide movement is in full swing at Kamloops. Two patrols and one of cubs are already formed. They propose to camp near the Bow River.

Last Sunday a very interesting contest took place at E. J. Mackie's ranch east of Cluny, when forty Strathmore friends accompanied their Club to the ranch where a pleasant day was spent. The Strathmore Club lost to Strathmore 95-73.

Mr. and Mrs. Duncan Gillespie are spending the summer with Mr. and Mrs. Ed Urich at Kensington, P.E.I.

Misses Carrie Boyden and Alice Brecken won the Busy Store essay contest. As the boys were too slow Mr. Ramsay has given the two girls each a prize, so the boys will have to go without a brand new suit. Each of the girls captured first prize, consisting of a dress, pair of shoes, pair of less and a summer hat.

Mr. and Mrs. Reid are spending a few weeks at Banff.

Thos Henderson returned Monday from taking in the Edmonton exhibition.

Mr. and Mrs. J. M. Telford took in the Edmonton exhibition, returning home Friday.

The Queenstown farmers picnic was a grand success.

Wm. Service is the latest to join the American Legion. Billy is some shot and will surely get some Huns when he goes gunning.

J. A. Ramsay, F. C. Vigar and the Duke of Connaught spent the week end in Banff, all leaving there on Monday. Banff is by now normal once more.

Mr. and Mrs. C. H. Walker are happy in the arrival of an heir and son at their home on Tuesday July 11th.

P. McLean, the census taker, has been having considerable difficulty in getting some to supply information. The lowest fine \$100 for neglecting to give the information.

Emil Griesbach will next week re-open the picture show. He intends to give three shows each week and to reduce the price of admission.

Geo. Keena was accidentally killed at Cluny last Thursday morning while repairing a bridge.

## Baseball Game Worth Seeing

The most interesting baseball game of the present season is billed to take place on Wednesday, August 5th, at 4 p.m., on the Gleichen diamond. This will be the second annual game between former old time Gleichen baseball stars and the local All Stars.

This game, as the first one did, should create keen interest and any amount of enthusiasm among the fans. Again it is a game between age and youth. The All Stars will lose some players who are eligible to play with the Old Timers, thus weakening their team to a certain extent. For the Old Timers some of the players are still in active service, while others play once in a while.

Last year the game resulted in a win for the Old Timers, 5-2. The game did not go the full route being called at the end of the sixth on account of rain. It is still an open question which team can carry off the honors over a full route of nine innings. However, the old boys on that occasion showed they could swing a heavy club, make safe hits and bring in runs.

After the game the ball players will be entertained to a banquet in the dining room of the Community Hall at 7 o'clock this will be followed by a dance at 9 o'clock. The dance will be open to the public who are invited to attend.

Among the players who will be seen on the Old Timers line-up will be the following: F. Miller, Atwood; J. McArthur, Gleichen; W. Somerville, Cluny; W. Jeffers, Gleichen; I. Stinson, Carseland; W. Service, Gleichen; George Mace, Mossleigh; K. Burrows, Duckess; A. Wilson, Gleichen; K. McIntyre, Gleichen; Harry Benton, Carseland; Steve Williams, Queensdown; Babe McArthur and Geo. Allistot, Gleichen. The veteran baseball manager, J. O. Bogstie, will manage the Old Timers again this year.

## DRIVING CAMPAIGN WINS MUCH SUPPORT

Campaign for safety in driving, waged for some years has won recognition in various parts of the province. In different centers, police officers are taking steps to carry on active testing operations and otherwise see that machines are in proper shape mechanically. Now that summer driving is in full swing fresh warnings is sounded by the A.M.A. congested highways, besides such factors as high speeds and recklessness, and possible strange roads, all combine to make the summer driving period the most critical in the year.

Appeals to both drivers and pedestrians for observance of safe driving and walking in order for the first time to end the seasonal increase in traffic accidents, have been made south of the international border, where press and radio are being utilized in a safety campaign. Last year traffic fatalities rose steadily until the figures for August were 50 per cent greater than the toll for February. The A.M.A. has issued a list of nine safe driving rules, which if observed, will keep a lot of motorists out of trouble this season. These include: "Keep your car in sound condition; keep your car under control; keep your eye on the road; don't mix liquor, worry or anger with gasoline."

## CANADIAN IDEA IN USE OF SALT

Directly and indirectly, salt plays an important part in all industries. For example, apart. For example, apart from personal use, it is fairly well known that about a million and a half pounds of salt are used annually in Canadian poultry and live stock feeds and over five million pounds in Canadian fruit and vegetable preparations every year. The application of salt in making roads of the kind particularly beneficial to farmers is not so familiar. The use of salt in roadmaking is a Canadian idea which is being widely adopted in other countries, as the result of experiments originating in the province of Nova Scotia.

Following the experiments in Nova Scotia, laboratory work was carried out by the National Research Council of Canada and by McGill University, and subsequently the matter was taken up by the United States. During the past three years, considerable mileages of salt-stabilized roads have been laid in the provinces of Ontario and Quebec, as well as in the United States.

These roads which are essentially of the low-cost, secondary highway type states A. F. McGill of the National Research Council consist of a clay bind in admixture with coarse minerals so proportioned and graded as to give maximum density under the compressive effect of traffic. The properties of the clay are improved by an admixture of certain chemicals, notably calcium chloride and salt. Calcium chloride has been in use for many years as a dust layer. Its use in an integrally mixed stabilized roads is a comparatively new development and the use of salt still more recent. Investigators claim that the salt has two major effects. It retards the evaporation of moisture when the road is first laid and the growth of salt crystals as the road eventually dries out tends to diminish shrinkage and cracking of the clay bond. The latter is an important feature as the elimination of shrinkage tends to prevent ravelling of the mineral aggregates under power traffic.

## WHEN TO PRINT AND WHEN TO LEAVE OUT

When to print a disagreeable story and when to leave one out of the paper is one of the most troublesome problems of the small town editor. In the case of a person who is unfaithful to a public trust, or one who is guilty of a serious crime, it is not difficult to decide, because the public interest, as well as the public's right to have the news, demands that it be printed.

There are some cases, however, in which the offence is entirely of a personal nature, and in which publishing the story would bring sorrow and embarrassment to innocent persons without serving any useful purpose. In these the making of a proper decision is often not easy. If the story is printed, relatives and friends of the person concerned will feel that it is unnecessary; and if suppressed, the scandal-mongers will be disappointed. These same scandal-mongers would howl the loudest, however, if their own shady actions were held up to the public gaze.

So it's hard to please everybody and no editor of sense tries to please everybody. He must let his own judgment and his own conscience be his guide.

If he errs on the side of kindness and sympathy for the unfortunate, his error will be forgiven and forgotten by the more enlightened readers of his newspaper.

He who keeps too many irons in the fire gets burned.

## U.F.W.A. MEMBERS HEAR REPORT JUNIOR CONFERENCE

With eighteen members and visitors present the U. F. W. A. held their meeting at the home of Mrs. S. Hall on Thursday, July 16th.

Miss Goodwin read the June Bulletin on Political Economy and a very interesting reading course. A very nice letter was read from Ms. Anderson, director for this constituency. A discussion took place on forming a Junior Local, which was left over to the next meeting, when names will be handed in for same.

Miss Ruth Umbricht gave a splendid report on the Junior Conference which was held in Edmonton last month. Barbara Day favored the members with a reading titled "Thank Goodness I'm at Home Again," after which a dainty lunch was served.

The next meeting will be held at the home of Mrs. E. Etheridge on Thursday July 30th. The members are requested to note that this meeting is not programmed for that date.

## REPORT OF ALBERTA CROP CONDITIONS

(Issued by the Alberta Department of Agriculture, Edmonton, July 17.)

Extreme drought conditions have continued during the past two weeks in southern and east-central areas, with the result that in the eastern portions of these districts particularly, hope for harvest of any consequence has been abandoned. That part of the Province from the Taber, Medicine Hat line north through the Berry Creek area to Provost, has suffered most intensely, and an almost complete crop failure is accepted by the major portion of this section. Pastures and forage crops in these districts are burned up and shortage of feed is a cause of immediate concern. It is still hoped, with the advent of rain, that a portion of the grain crop may yet be salvaged as feed, but the feed situation in any case is likely to be quite serious.

In the more westerly districts from the U. S. boundary north through the

## NOW A NEW BIGGER BAR

## MORE SOAP AT NO EXTRA COST

The new Sunlight Soap—is the same pure, quick-dissolving soap that has lightened the wash-day burden of millions of housewives... the only soap with a \$5,000,000 guarantee of purity... easy on the clothes and hands. Ask your dealer for the new, larger Sunlight bar and save money.

Now a bigger bar in a simple carton. The 4 small bars in one carton will no longer be obtainable.

A PRODUCT OF LEVEE BROTHERS LIMITED

## Celebrate 50th Anniversary

Featured by a congratulatory telegram from His Majesty King Edward VIII and the presence of dignitaries of the state, outstanding members of the business and social world, railroad officials and several thousand citizens, the Canadian Pacific Railway on Sunday, June 22, 1936, amid the acclaim of the entire nation.

The royal message, which was the highlight of the enthusiastic anniversary celebration on June 22, was followed by a sincere thank all those associated with the Canadian Pacific Railway Company for their loyal assurances on the occasion of the Fiftieth Anniversary of this great railway which ever since its inception has played so notable a part in the development of the

Dominion of Canada." Transmitted to the company in the name of Sir Edward Beatty, G.B.E., K.C., LL.D., chairman and president, by His Excellency Lord Tweedsmuir, the Governor-General of Canada, it served as the spark to the enthusiasm of the notable assembly of several thousand at Windsor Station.

The programme, colorful and impressive, was broadcast on a coast-to-coast network of the Canadian Radio Broadcasting Commission, and was completely recorded in still and moving pictures. In addition to the message from His Majesty and the military ceremonies, it included a message from Sir Edward Beatty, G.B.E., K.C., LL.D., chairman and president, published by the Dominion of Canada, which was read by Mr. W. H. McRae, vice-president of the company. His Worship Mayor Camillien Houde of Montreal, Hon. Marquette Shaughnessy, who is daughter of the third president Lord Shaughnessy, P. M. B. Roberts of the Edinburgh Scotsman, D. D. Graham of the London

Times and others. Mrs. Camillien Houde, of Montreal, cut a birthday cake six feet in diameter and nine feet tall. The Victoria Rifles of Canada, which supplied the Guard of Honor when the first train for the Pacific left 17 years ago, again supplied the Guard of Honor under Colonel I. W. Eakin. The band of the regiment, in addition to its concert music, played God Save the King as the Guard preceded arms when the anniversary train pulled out. The long association of the Company and the Royal Canadian Mounted Police was recognized by the great force. A detachment of the Mounties took part in the ceremonies, and added a touch reminiscent of prairie and mountain construction days.

The celebration was continued at Ottawa and all main-line points west to Vancouver and thousands came down to the suburban stations to catch a fleeting glimpse of the decorated anniversary train.

DIXIE gives you a long cool smoke. . . And it's always FRESH in the plug.

## Loans For Agriculture

Appropriate was the warning issued recently to investment companies and investors by S. P. Grosch, K.C., chairman of the Local Government Board of Saskatchewan when he told the Investment Dealers' Association of Canada in session at Jasper, Alberta, that they could not expect to be collectors alone, but must be prepared to continue to loan money.

At the same time, according to press reports of the convention, Mr. Grosch told the bond dealers that they "must be quick to offer concessions and help in debt adjustment if investors are to retain their status and the protection they now have."

It is generally well known that many of the loan companies, if not all of them, have shut down on loans in the prairie provinces and particularly in this attitude applicable to loans to farmers. Where the security is ample and prospects of repayment on maturing dates exceptionally good the mortgage companies are accepting a limited number of "risks" in the cities, but little if any loan money is available to western farmers just now, no matter what their record, how good the security they have to offer or how excellent the character of the prospective borrower.

Thus the farmer and the agricultural industry generally in the west is in somewhat parlous condition when it comes to securing credit to make needed improvements or to carry on operations. It is true that there are governmental boards in existence for the purpose of making agricultural loans but these institutions have either no money available or such a small amount in comparison with the needs of the day that they are obliged to restrict their activities to a few select loans.

In the very few instances where mortgage corporations are prepared to advance money they are still insisting on a return of seven per cent. for their investment and this is a higher rate of interest than borrowers can afford to pay in the light of income from ordinary revenue sources.

It is admitted, of course, that there are two sides to this story as with most stories. Loan company managers say that as custodians of private funds they cannot afford to loan money in the prairie provinces at the present time and particularly they cannot afford to run the risks of making loans to agriculturists. They point to the past few years of combined general economic and agricultural depression, the latter resulting from drought, surplus stocks of wheat and low prices for agricultural produce as an excellent reason why they should keep their purse strings tightly drawn when the farmer asks for a loan.

But more particularly do they insist against what they regard as repressive legislation enacted by the several provincial governments as a potent reason for withholding credit from the farmers, legislation which has been placed on the statute books in the belief of the sponsors that they are protecting debtors at a time when they knew not which way to turn to escape from almost intolerable burdens.

Possibly the loan companies themselves are not altogether without blame for this class of legislation in at least some instances, if Mr. Grosch's diagnosis of the cause of it is correct, for he is reported to have declared his belief that "one of the chief reasons for placing upon the statute books legislation which limits the rights of loan companies is to be found in the fact that some companies have adopted an attitude of drift and desire to wait until something turns up, with the result that the debtor gets in touch with a member of the legislature and demands all sorts of drastic legislation against loan companies."

One cannot get away from the fact that in the past four or five years, because of depression, conditions and lack of credit, farm property has perforce been allowed to run down at heels, due to the impossibility of renewing or replacing worn out equipment with anything like the degree necessary to continue to operate on an economic scale or to provide new implements to meet changed methods necessitated by changing conditions.

Almost every farmer knows by experience that this is the case and if he is unable to secure the necessary credit to enable him to replace the worn out tools of his trade and to purchase new equipment necessary for economic operation, the day when he is going to be able to pay his past indebtedness is further deferred and the loan company and the farmer alike suffer as a result.

Since the entire western country is still largely dependent upon agriculture for its future as well as its present welfare, it would appear to be good business for the loan companies to offer concessions in the matter of debt adjustment to a feasible limit and continue to loan money at a reasonable rate for agricultural purposes where the security is satisfactory. Such a course would appear to be in their own interests, in the interests of the clients whom they represent, in the interests of the farmers and in the interests of the country to do so.

### Paid While It Lasted

"Washing" cancelled documentary stamps, worth from \$1 to \$20 apiece, and selling them again at full value to unsuspecting commercial houses, was a racket uncovered by Secret Service men in Boston. Stamp-collectors sold the stamps to the "washers," who were accused of doing the Government out of \$500,000 on stamps used for deeds and stock transfers.

The early Indians of North America made beads from the shells of clams, fresh-water mussels, and abalone, and used the beads as a medium of exchange. It was called "wampum."

### Used Diplomacy

"Dearest," said the young mother, "I've decided to name our baby Samantha." Disagreeing with her on the choice, her husband tried to solve the situation diplomatically. Finally, he said: "After all, that will make a fine name, dear. My first sweetheart's name was Samantha. I'm sure she'll feel complimented."

The baby was named Janet.

Junior: "What are distant relatives?" Father: "They're the kind of people who call on you after making a long trip, and wish to avoid paying hotel bills." 2109

## Park System In B.C.

Acres Of Show Gardens Being Planned For Province

Six million acres of show gardens are being planned for British Columbia. Provincial and federal ministers are putting their legislative heads together to push immediate development of scenic parks in the coastal province. Some are already well finished; others still a pencilled outline on the map.

Out of \$2,000,000 expected to go into public works this season, a sizeable lump will be used in grooming parks and building roads to make them easily accessible. The province, however, would hand over to the Dominion parks on which development has already started and concentrate upon new ventures, including the 3,000,000-acre tract named for Canada's governor-general.

At present the province looks after five of its parks and has mapped out four more for development. The Dominion has four more, completing a system that provides six acres of parkland for every inhabitant of British Columbia and more than half an acre for every person in the Dominion.

The 973 square miles of Garibaldi Park will be brought closer to trunk highways with completion of a \$5,000,000 suspension bridge spanning Burrard Inlet and joining Vancouver with its northern suburbs. Preliminary work on the giant bridge already has begun.

Up until now Garibaldi Park, cradled in the coast range, has been inaccessible to motorists. Game abounds in the timbered reaches, in the Alpine lakes and on the slopes of one of the volcanic mountains that rises to a height of 9,000 feet.

The province is keeping Tweedsmuir Park for its own. This vast garden that covers 3,000,000 acres of rivers, mountains and lakes, is largest of all. At present the untended acres are threatened only by trails. Development of roads will be considered under a public works plan carried out by provincial and federal governments.

## Maple Syrup Crop

Quebec Produced Largest Quantity This Year Since 1892

One of this French-Canadian province's foremost industries, the maple crop, this year reached the bumper proportions of 1,581,600 gallons of syrup and 5,747,900 pounds of sugar, a major portion of which was shipped to the United States. The largest crop since 1892, the maple sap produced a revenue of \$2,267,300, as against \$1,911,000 in 1934.

More than 40 per cent. of Quebec's maple sugar crop is annually bought by cigarette manufacturers in the United States, officials say. Meanwhile, French chemists are said to be experimenting on the possibility of using maple sap in the production of alcohol.

## Roquefort Cheese

More Than 25,000,000 Pounds Are Manufactured Annually

More than 25,000,000 pounds of Roquefort cheese are manufactured annually in the picturesque French village. For more than 11 centuries this cheese has been manufactured on a commercial basis, but Roquefort cheese, itself, goes back even farther in history, as it is mentioned by Pliny the Elder who wrote in the early decades of the Christian era.

More than 200,000 persons, working on 25,000 farms, are employed and earn their living directly from the cheese industry. Milk is contributed by 700,000 sheep, tended by 10,000 shepherds.

## Preferred More Dignity

Servants Of English Earl Did Not Like His Democracy

Many years ago we used to correspond with Auberon Herbert, the son of the fourth Earl of Charnhurst, who, although a vigorous opponent of socialism, was one of the most democratic of aristocrats. He was so democratic that he insisted on his servants sitting at table with him. His wife, his servants disliked his democracy so much that at the end of a week they gave him notice that they were going to quit.—The Argonaut.

## Trying New Method

On three farms in Oxford county, Ontario, an experiment is in progress with a new method of preserving alfalfa. The crop is stored in the silo in green condition and treated with acid.

England has two of the fastest battle cruisers in the world, the Repulse and the Renown, each having a speed of more than 31.5 knots.

## Clever Men Beat Bank

Worked New System But Were Subsequently Caught

This stunt was revealed by an official of an important bank, victimized by the perpetrators, who since have been arrested. . . Two partners, ostensibly operating a legitimate business, opened a check account and deposited \$10,000. Within three months they had increased the fund to \$32,000, making the deposits in person, and getting to know the bank tellers. One partner then appeared, asking to cash a partnership check in the sum of \$29,458.27. The teller recognized the signature, okayed it, and then—as is customary—used the teller's autograph, and the official upstairs wrote in reply: "Okay, okay. I told you it's okay." . . . The loss was more than \$27,000.—New York Post.

## Eliminates Fire Hazard

Automatic Extinguisher For Airplanes Has Been Perfected

Fire is to be banished from aviation, according to British scientists who have been working for a long time on a new blaze-prevention system for airplanes. Reports received in London say an automatic fire-extinguishing arrangement has been perfected which makes it almost impossible for a machine to catch fire, either in the air or after impact with the ground. Extinguishers are fixed in vital parts, on the gasoline tanks, with jets leading to the gasoline pipes over the engines, in the passenger cabins spring-operated automatic nozzles, and on the fuselage. They have spring-operated automatic nozzles which act if a bump exceeds the pressure at which the spring is set. Extinguishing liquid sprays out even before fire can start and no flames can survive the action of this liquid.

## Hypnotic Suggestion

Lecturer Claims It Is Wonderful Help In Battle

Students of the Royal Dental Hospital in London have had their teeth cracked, chipped, filed and extracted, all without anaesthetics—and all without pain. It's done by hypnotic suggestion. "That's the thing mysterious about it," claims William Lovatt, who is lecturing on "hypnotic dentistry" in several large London hospitals, "it is a perfectly natural process and in no way harmful." "A suggestible patient—and 70 per cent. are—has only to accept suggestions for anaesthesia and he can submit to the forceps or drill confident that he will feel nothing, either at the time or afterwards." Experience with 3,000 cases, he says, has convinced Mr. Lovatt that the possibilities for hypnosis in modern medicine are enormous.

## Lifted Tons Of Money

W. T. Duggan, of Blackpool, England, just retired from the Corporation service, has lifted over 300 tons of money in his 30 years of collecting from penny-in-the-slot meters. His collection, he estimates, has averaged \$60 daily in coppers, or about \$675,000 in 30 years. As \$5 in copper weighs just over five pounds his aggregate collection totals 362 tons.

## Snowshoes For Quilts

The Dionne quintuplets will be able to waddle around in the snow next winter without sinking if Mike Lyons, of Clayville, New York, has anything to say about it, for he has constructed five pairs of snowshoes for the girls from Callander.

The hardest thing in making a speech is to know what to do with your hands.

AFTER EVERY MEAL

## Using New Ceremony

Dominions To Have Special Part In King's Coronation

The British Dominions will have a special part in the crowning of the King, a cable to the New York Times from London, said. It adds that following the coronation next May, King Edward VIII will make a tour of the Dominions.

"When Edward is crowned in Westminster Abbey on May 12, 1937," it says, "Canada, Australia, South Africa and New Zealand will receive positions in the ceremonies emphasizing their new importance as self-governing nations under the Statute of Westminster, enacted since the last coronation."

"In accordance with this statute, the King becomes not only ruler of the British Empire as a whole, but separately and distinctly King of the Dominions. A new ceremony will be prepared stressing this conception of the King as the direct head of each Dominion. Through the Dominions Office conversations have reached an advanced stage regarding the exact part the Dominions will play. The crowning of the King in this new form will be the prelude to a royal tour of the Dominions."

## SELECTED RECIPES

### ROLLED NUT WAFERS

1/2 cup "Crown Brand" corn syrup  
1/2 cup butter  
1 cup bread flour  
1/2 cup sugar  
1 cup chopped walnuts or peanuts  
Heat the "Crown Brand" corn syrup to the boiling point, remove from heat and add butter. Then, slowly and stirring all the time, add the flour which has been sifted with the sugar. Now add the chopped nuts. Drop small portions from the tip of a spoon on a greased cookie sheet, 2 inches apart. Bake in a slow oven. These cookies can be rolled or just left plain.

## Glider In Stratosphere

May Be Possible According To Tests Made In Moscow

Giders may be able to reach the stratosphere ere long, according to reports from Moscow. By a new method a glider may be towed to a great altitude, the towing wire then paid out until the glider is 6,500 feet above the towing plane. If a second glider is towed by the first and its line paid out it can ascend above the first. Thus a plane flying below the stratosphere can, by this flying "chain" tow a glider miles above it. Gliding Master Venslav has been making the tests.

## Faster Speaking

It is interesting to have the testimony of George Emery (who has written 150,000,000 words in shorthand) to the fact that people speak much faster than they did; the average increase he estimates at something like 25 per cent. The coming of the motor-car seems to have affected the national rhythm. Even much of the music we hear is taken considerably faster than the composer intended.—London Observer.

Not until 1870 were milk cows known in Japan. An American cow was imported at that time and two men, selected for their strength, were assigned the task of wrestling the milk from her.

## Working On Anti-Fog Ray

Marconi Is Busy Trying To Perfect New Invention

Were Charles Darwin alive, he would not agree with the dissipation of the dank vapor which assails Great Britain mainly during cold weather, for the famous naturalist's delight of London was founded in a fog.

He gloried in its "grandeur," as he said, and always looked forward to wintering in the metropolis, attracted by the prospect of a smoky mist. Although the origin of the species of town fog is the deadly smoke, harbringer of ill health, the Victorians suffered these visitations with no hope of a "cure"; but today scientists are having promising results.

Recently there have been many attempts to find the best method, and the outcome seems to be that future research will be centred around the aeroplane. The basis of experiments has been to spray chemicals down on the fog, and the mist will vanish if sufficient anti-fog mixture is used. Already headway has been made, but the drawbacks at present are the cost and lack of facilities, for a huge fleet of planes would be necessary to remove a yellow "peascodner."

The most recent anti-fog developments promise to end all this fog, however; in the midst of "war-ray" talk and the "mystery beam," which detects enemy ships and hostile aircraft flies miles away, comes the report that Marchese Marconi is perfecting a great anti-fog ray.

When, or whether, this ray will mature cannot be said; but it would appear that a definite fog-dispelling invention of wide application will be available. It may be a ray, a powder, or chemicals. Everything depends upon the scientists.

## Forgotten Eskimo

Scientists Will Search For Traces Of Civilization In Eastern Arctic

Traces of a forgotten Eskimo civilization in the eastern Arctic will be sought by a Dominion government scientist who left for the north on the Nasopie, sailing from Montreal.

It is the annual patrol to government posts in the north with the holds of the veteran Arctic ship bulging with mail and supplies. In a 10,000-mile cruise she will take the ship within 800 miles of the North Pole, contact will be made with 35 posts.

Included among the passengers was Douglas Leechman, an anthropologist from the National Museum, who will spend several weeks on the Bughton Islands, lying at the eastern tip of the Ungava peninsula.

In the far-eastern Arctic, tools of bone and ivory have been unearthed that bore no resemblance to those used by Eskimos in other sections of the north. Scientists believe they indicate a peculiar Eskimo civilization now extinct, which Leechman will try to trace. He will probe old village sites on the islands in the hope of finding some clue to the date and character of the ancient culture.

By improved technique, surgeons report that it is now possible to cut and lengthen bones so as to extend a shortened leg as much as five inches.

No enemies to forgive? Then pardon a few friends.

## WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should not get out of control. It should flow freely, your food doesn't digest, it just goes to the liver. It takes time to get your stomach. You can't expect it to digest. A new low movement doesn't mean you're sick and the world looks pale.

A new low movement doesn't mean you're sick and the world looks pale. A new low movement doesn't mean you're sick and the world looks pale. A new low movement doesn't mean you're sick and the world looks pale.

## Thou Shalt Not Love

— A NOVEL BY —  
GEORGIA GRAIG

CHAPTER I.—Continued

Starr had not realized that her tempestuous words had been spoken aloud until the man's voice interrupted. It was a crisp, pleasant voice, with a lazy, amused drawl. She whirled around to face him, hands gripping her handbag tightly as the nearest support.

The man had detached himself from the careless crowd, and stood not far from her elbow, indolently leaning against a corner of the show window frame. He was looking down on her with quizzical gray eyes that held a glint of humor in their depths. For that first startled moment Starr's complete vision was filled with him. He was tall, handsome in a bronzed, broad-shouldered slim-waisted way, with a physique that bespoke the owner's pride of its possession in its count. He wore dark, smartly tailored clothes which were unerringly placed in their category of good taste. Money, too, of course. That he was accustomed to that as to the air he breathed was in his slightly arrogant features, features which had just the proper tinge of hardness to give him an air of interesting masterfulness.

The smile of tolerant—or was it condescending?—amusement curved his lips more widely as he looked straight into Starr Ellison's upturned face, from which the eagerness of her passionate plea had not fled.

"So you want to play, do you?" he repeated, with maddeningly slow emphasis.

Starr could not understand why on the instant she was not annoyed at his intrusion, or his very apparent sibilant. Such a short time ago

the Starr Ellison she had always known would have thought furious: "Manher!" and one look would have been a crushing retort to him.

Today it did not matter. Such things were of so small account. Nothing mattered anyway. Every thing was an affair of relativity. Things were important only because of the bearing they had on your future. With barely six months to live, which could be considered practically no future at all, what did it matter what she might say or do? What anyone else in the world might say or do?

Even though she was surprised at herself, Starr returned the contemplative scrutiny of the gray eyes that were amusedly regarding her. She placed him. Readily. The man before her represented that gay, smart world she had never known, for which she had yearned—the other half of the world which knew how to play. He had taken advantage of the opportunity. He stood for all she had lost in life and could never hope to attain.

She cried out at him suddenly, her eyes blazing at him as though she were, through him, hurling her defy to earth and heavens:

"Yes, if you must have it! More than anything else in this wide world, I want to play!"

The smile in his eyes was tauntingly on his lips, as he drawled:

"That, I should imagine, should be something not too hard to arrange—" But, gazing at herself, Starr was backing away, long lashes dropped over her confused eyes. What had she done? Unnoticed she backed into a passerby. The gray-eyed man's hand went out to touch her arm.

"Wait a minute," he said. "We ought to talk this over a bit, hadn't we? There's no hurry. . . . His smile was friendly. "The Arabs, you know, have a saying: What is there to hurry for? We are all going the same way. Why should we try to pass one another? Let us enjoy today, for today will never come again." Of course this isn't Egypt, but—"

He stopped short at the look of blazing fury in the depths of the girl's dark, mysterious eyes. Her voice was a flame at him.

"I hate Egypt!" Then she was gone, flying up the avenue, losing herself in the crowd, never looking back. Michael Fairbourne stood staring after her. Then he grinned and shrugged as he lighted a cigarette and moved carelessly along the street.

"Seem to have dubbed my shot again, eh?" he murmured. Then he glanced along the street as if again seeing the black-eyed girl with the camella skin. "Still, I'm wondering a little—"

### CHAPTER II.

There was no good reason for Starr Ellison to be on Fifth Avenue that cheerful early Autumn mid-day. Only that it was not Sixth Avenue. Nor was there along it any employment offices, wordlessly insisting on her need for job hunting in the sordidness.

After her visit to the doctor, with whose smiling assistant she had, incidentally, left the greater part of her small remaining store of cash—for the privilege of being told she had only six months more to live—such small and distasteful matters as searching for a job appeared of small moment. Especially when there were no jobs. Why keep on hunting for one by which she could merely keep the breath of life in her body for six months more? It hardly seemed worth while.

Such thoughts were in Starr's mind as she fled along the street after her tempestuously uttered rebellion against Fate in the atmosphere of the prosperous Avenue. Nevertheless, she mechanically turned at the next corner and sought the street made clamorous by the El overhead, and headed for the agencies which were on her list and not already tried that day. She couldn't be a quitter, why, she supposed, even if she had no short a time to fight. Work was most necessary at the moment. Vitally so, for she had a most distasteful memory of her sentence that morning with the keeper of her rooming house, dreary, hopeless kind of place it was, but Mrs. Maloney who kept it, had made it quite plain to Miss Ellison that she had waited for her rent quite long enough, and that while she was right sorry that Miss Ellison couldn't get a job, there were plenty of other people in the same fix. After all, Mrs. Maloney's was not an eleemosynary institution. In other words, Mrs. Maloney had conveyed to Starr that if she was prepared to pay her three weeks' arrears of rent that she could have her clothes. Otherwise—

None too pleasant a prospect, and it was beginning to look like a rough ride ahead for a girl who, at most, had in her purse only enough for lodging for a night or two some-

where—without baggage. Even if she were going to pass out in six months, in the meantime, she supposed, she would have to sleep somewhere.

A wry smile crossed Starr Ellison's lips as she rushed along, she—she!—who didn't know where she was going to sleep that night, had been wasting her time on Fifth Avenue, rebelling against not having a taste of life. She had been wanting to play!

She didn't know that noon had come, and forgot that her breakfast had been a doughnut and a cup of coffee until she suddenly realized that the crowds who were jostling her, elbowing her, were making their way into the rows of eating places that sat cheek by jowl along the cross street. She stopped still before one of them, drawn irresistibly by the sight of the good things to eat temptingly displayed. Another show window!

She forgot that she was hurrying to look for a job, forgot she had wanted to play, forgot even for that minute what that doctor had told her, as her eyes widened at sight of the food, and then swept on further to the people at the tables. In her eyes was an expression of looking upon some amazingly absorbing scene, but it was no more upon which she gazed than the vista of food and warmth that spread out in one of those restaurants which not so long ago Starr Ellison would not have bothered to give a passing glance.

Two prosperous looking business girls were having their luncheon near the window—a substantial meal, with a steak that was simply oozing butter gravy, new peas and the crispest looking salad.

(To Be Continued)

### Likes Canadian Kitchens

England Behind In That Respect States Woman From Wales

Kitchens of Canada and the United States had been a revelation to many countrywomen from across the sea, Mrs. Frank Gresham, of Wales, at the recent convention in Washington of the Associated Country Women of the World, commented as she passed through Montreal en route for her home.

Mrs. Gresham said that in English kitchens old pans and old ways were too prevalent, while kitchen planning was still too much "an idea only." "It is nonsense to say we have nothing to learn from other countries," she remarked.

Bamboo Tree Grows in B.C. Basil Keys, British Columbia horticulturist, is creating a tropical paradise. Seeking to prove that his theory that bamboo trees can grow in Canada, Keys completely surrounded his home with a half-acre varieties of the tropical trees. The trees were flourishing.

Every 10c Packet of WILSON'S FLY PADS WILL KILL MORE FLIES THAN SEVERAL DOLLAR WORTH OF ANY OTHER FLY KILLER

10c WHY PAY MORE

Best of all fly killers. Clean, quick, safe, cheap. Ask your grocer, druggist, or general store.

THE WILSON FLY PAD CO., HAMILTON, ONT.

"I wish I hadn't bought that CHEAP MUSTARD!"

"I am surprised at you. You know KEEN'S is the best."

"Well, I thought when I was putting my pickles I could save some money by buying cheap mustard. But never again! Cheap mustard has not the flavour, the strength nor the keeping quality. I've learnt my lesson. It pays to buy the best—KEEN'S D.S.F. MUSTARD."

Made from seed grown in the Fens of England. Shells or hulls are removed and only the inner part of the seed is used. Superfine grinding ensures the full mustard flavour.

In original tins for 10c

KEEN'S D.S.F. Mustard

GOLMAN-KEEN (CANADA) LIMITED 1600 Ambrose Street, Montreal, P.Q.

## His Majesty's Portrait FREE

Copyright—Starr

THE makers of Bee Hive Golden Corn Syrup and Durham Corn Starch are happy to offer to their friends throughout Canada a handsome two tone reproduction of His Majesty, King Edward VIII. The portrait, (by Bassano) is one of the most recent and has been specifically designed for framing, measuring approximately 9" by 11". It is restrained and dignified and when framed will blend in perfect taste with the furnishings of the finest room. Many well deserved compliments have been received on the beautiful appearance of this portrait.

ST. LAWRENCE STARCH CO. LTD.

### How to Secure Free Portrait

Send in one Bee Hive Golden Corn Syrup label and one Durham Corn Starch label with your name and address written clearly on the back of either label, along with the words—"King's Picture." Mail to the St. Lawrence Starch Co. Limited, Dept. S, Port Credit, Ontario and your free portrait will be forwarded promptly.

### The Big Nickel

Looms Large On The Collection Plate, And Is As Common As Sin

"One of the hardest things the church has to face is the big silver nickel," Rt. Rev. John Lyons, lord bishop of Ontario, said at the unveiling of a tablet in St. James Memorial hall at Joyceville, near Kingston, Ont.

"The big nickel is as widespread and as common as sin itself," he said. "It is often a matter of wonder to me how people manage to collect so many. People contribute adequately without complaint to amusement. Probably if these people fully realized the problems of the church they would be of greater assistance."

Native Shrubbery

The scarlet fruit of the silver bough tree imparts a gay touch to the prairie farms where the tree is used in the surrounding shrubbery. It is a native of the prairies and is found in the keeping quality streams from the Pembina mountains in Manitoba to the Bow river in the Rocky Mountains. In the Manitoba hills the tree grows to a height of 18 feet. It is generally armed with thorns.

### Removing Old Arch

The Arch of Triumph, built by Alexander I. to celebrate Napoleon's retreat from Moscow, is to be razed to make way for traffic. The arch, more than 200 years old, stands on Gorky street, near the White Russian Railway Station, point of arrival and departure of tourist trains.

### Horseback Trail

Will Be 2,800 Miles Long, Extending From Canada To Mexico

Plans for a horseback Pacific coast trail, extending from Canada to Mexico, have been announced by the National Park Service.

It will be 2,800 miles in length and will be continuous on all the higher mountain trails on the coast. It also will connect all intervening national parks.

Nearly all of the work is to be done by the CCC and the trail is expected to be completed this year. Metal signs will mark the entire route for the benefit of horseback riders or hikers.

"I know an artist who painted a cobweb to real that a maid spent an hour trying to get it down."

"Sorry, but I don't believe you."

"Why not? Artists have been known to have done such things."

"Yes, but not moids."

Cut flowers last longer in water if the lower leaves are removed from the flower stem, so that they do not decay in the water.

### Little Helps For This Week

That good thing which was committed to thee, keep by the Holy Ghost which dwelleth in us. 2 Timothy 1:14.

Oh! that the Comforter would come. Nor visit as a transient guest. But fix in me His constant home, And keep possession of my breast. And make my soul His loved abode. The temple of indwelling God.

The real progress of your soul in the divine life is a tender plant. It requires stillness, meekness, and the unity of the heart totally given up to the unknown workings of the Spirit of God, which will do all its work in the calm soul that has no hunger or desire but to escape out of the mire of its earthly life into a life with God. It is not wise to yield to an eagerness of many things which although they seem innocent will divide and weaken the workings of the divine life within you.

The French were the first to use airplanes extensively.

## How Can We Improve it?

"How can we make it better?" is the constant cry of manufacturers of advertised merchandise.

Why?

It might well be pride in the product that bears their good name. Often it is.

But not always.

It's just good, hard-headed business, mostly. The improvement of a product that is already considered satisfactory makes that product play a more definite part in the life of the user. It wins and holds an added loyalty, and, of course, added business.

Every product being advertised in these pages is studied continuously by its maker in order that it may be more and more useful and helpful to you in your daily life.

Advertised merchandise is trustworthy  
merchandise

## Town & District

Mr. and Mrs. Porter arrived in town Friday from the States to visit with relatives.

Mr. and Mrs. Wm. Woodliffe and daughter Joyce, of Strathmore spent Sunday at the home of Mr. and Mrs. Earl Etheridge.

Everytime a few clouds gather in the heavens speculation begins if a hail storm is brewing. No one has for gotten last year's hail storm.

T. Halstead of Nekomis, Sask., spent a short time in Gleichen visiting his son C. W. Halstead. Mr. Halstead has since returned to his home.

Miss E. Frankton and Mr. W. Halliday and family of Calgary spent Sunday in Gleichen with Mr. and Mrs. W. Busby.

Miss Eunice Fox of Gull Lake, Sask., is a guest at the E. Etheridge home for the holidays.

After spending ten days camping at Sylvan Lake, the local Boy Scouts returned home Saturday afternoon in a special bus. All the boys state they had the time of their lives at the lake and were sorry to return home.

Monday was the hottest day we have had this year. Some reports have it that it was 99 in the shade during the afternoon. More people were heard to complain of the heat than at other time this summer.

J. O. Bogstie has moved his pool room into his new quarters in the old R. A. Brown, genteel furnishing store. Mr. Bogstie has now got a very attractive pool room with a home like atmosphere.

A man and woman with half a dozen dogs hitched to a sled, which had wheels for summer driving, arrived in town Friday morning. After spending the day at the fair grounds resting left in the evening bound for Halifax. They left Vancouver some four months ago taking plenty of time do not expect to arrive in Halifax for some months. The man is gathering material for a book.

A visitor in town Saturday night drew our attention to the fact that cars were parked in front of the fire hall and for many feet on each side of the entrance. Funny we never thought of that before but could not help wonder how the chemical engines and hose could be got out of there in a hurry if needed.

A most delightful annual picnic was held at the Bow River bridge last week under the auspices of the Gleichen Masonic Lodge, when a large number of members, their families and friends gathered. The afternoon was spent in games, baseball and children's sports under the supervision of Mr. J. F. Gervin, L. W. Taylor and Ralph Umbrite officiated in the capacity of camp cooks and at 6:30 all sat down to a splendid picnic supper. Sports were resumed after supper and a good time enjoyed by all.

### GLEICHEN UNITED CHURCH

Rev. J. N. Wilkinson, minister.

Mrs. H. Birch, choir leader.

Miss Jean Farquharson, pianist.

7:30 p.m. evening worship. The service will be in charge of Adjutant Sutherland of the Eventide Home. Our willingness to bear a cross is one of the best tests as to whether our loyalty to Jesus means anything. Is it a cross to meet for worship on a warm summer evening? If so let us remember that Jesus bore a greater Cross for us and this is one of our opportunities for showing that we are worthy of Him.

Who is responsible, anyhow, for the idea that price is all that will sell merchandise and that the public no longer considers quality or service? There has never been a time when a purchaser did not consider the quality of the merchandise which he wished to purchase and there never will be such a time. There is a pride in the possession of something better than can never be equalled by the feeling that it was purchased at the lowest price. All of the business that this continent once enjoyed was built upon the idea of quality rendered. The products of Canada were noted around the world because of their quality. Who sold the idea that quality does not count? Was it someone who had no argument except price. There is no satisfaction in owing cheap things. There is no economy in purchasing them. There is no profit in manufacturing them and there is no argument that can be advanced in their favor. If price cutting could make business, we would now be in a period of unparalleled prosperity. The present condition is the best proof of what is worth while.

## Cash

It was very early in the history of EATON'S that the principle and practice of buying and selling for Cash only was laid down. With certain exceptions we shall mention later, this is still the EATON way of doing business.

Today we still pay cash ourselves for our purchases, because by so doing we are able to buy to the very best advantage. And we confine our selling activities largely to the same basis for exactly the same reason—because Cash Merchandising offers the customer the lowest possible pricing on whatever she buys.

On certain items of furniture, furnishings and other equipment we do, as a convenience to customers, offer the terms of EATON Budget Plan. But the Budget Plan prices are higher than the Cash Prices. They have to be, because it does cost more to sell merchandise "On Time." The alternative of paying Cash is always offered, however—and there is always a worth-while saving when you do!

## EATON'S

The man who makes a fool out of himself always claims someone else did it.

It is queer how unforgiving the neighbors find you out, and how seldom the bill collector deceives.

Fine motto: Don't look for wider fields until you cultivate those you have.
